

Driver Safety Equipment Specification Regulations

Generic Wording for Individual Formula Regulations

Version 2025.01 (Published) – 21st January 2025

**Document produced by: Adrian Blackwell (BriSCA F2 Chief Technical Consultant)
on behalf of the ORCi**

In 2021 the ORCi agreed that the full "Driver Safety Equipment Specification Regulations" (DSES Regulations, for short) should be removed from individual formula regulations documents, and instead published in a central location to ensure consistency and integrity across all ORCi sanctioned formulas.

ANY previous ORCi DSES regulations should be removed from ALL individual formulas' rulebooks with immediate effect, and replaced with the standard text below.

Where an individual formula requires any additional or modified DSES regulations, these must be risk-assessed and ratified with the ORCi.

The ORCi have now produced the **2025** DSES Regulations which are published on the ORCi website.

The following standard text should be published in individual formulas' regulations:

ORCi 2025 Driver Safety Equipment Specification Regulations

The "Driver Safety Equipment Specification Regulations" are a common set of regulations, produced by the ORCi, governing the safety equipment used by drivers, and applicable to all ORCi sanctioned formulas.

These regulations are located in the "Technical" section of the ORCi website where they can be accessed by anyone, and managed in a controlled fashion to ensure integrity and consistency across formulas.

Drivers should regularly consult the ORCi website for the latest applicable regulations and updates:

ORCi Website Technical Section: <http://www.orci.co.uk/Content/Technical>

ORCi Website Home-page: <http://www.orci.co.uk/Home>
